# Floating Hide

WIDTH	50cm
LENGTH	110cm
TUBE Ø	30cm
WEIGHT	6.5kg

The inflatable floating hide.  
 The compact and lightweight solution. We know hundreds of DIY-floating hides. Made from belly-boats, styrofoam, PUR, PVC-piping and a lot of patience. Most of these designs came through several iterations. We have been there too. Our garage was a warehouse for floating objects. And then we stopped to make garbage. Time for a big change.

We started all over again and we designed our very own floating hide. An inflatable one which you can carry to distant lakes and hard to reach spots. You can even take it with you on the plane (just over 6 kilo). After more than a year of testing, fine-tuning and lots of feedback from some very experienced Photographers like Svein Wik, David Pattyn, Staffan Widstrand and Yves Adams we proudly present you the one and only MrJan Gear Floating Hide.

It's available as float or as a combination of a float and a tent.
